

Iguana Diet Canned

Product Description

ZuPreem® Iguana Diet Canned is formulated to be a nutritionally balanced diet for iguanas and other herbivorous lizards, and has been successfully fed to growing and adult green iguanas. Nutrition studies done in Costa Rica helped establish the optimum diet for iguanas. The study shows that early attempts at feeding captive iguanas resulted in diets that were deficient in adequate levels of protein and calcium. ZuPreem Iguana Diet Canned has optimum levels of protein, calcium and meets the established nutritional needs of herbivorous lizards.

► **Balanced nutrition with no supplements needed**

ZuPreem Iguana Diet Canned is formulated to meet proven nutritional needs for growth, maintenance and reproduction life stages

► **Highly palatable and readily consumed**

Alfalfa-based formulation results in a fresh smelling, great tasting food, assuring the animal consumes essential vitamins, minerals and amino acids it needs for proper nutrition

► **Optimum levels of protein and calcium**

Meets the established protein and calcium requirements of iguanas and herbivorous lizards, and helps prevent developmental bone disease common in caged iguanas

► **Added Vitamin D₃ compensates for minimal amounts of natural sunlight most captive iguanas receive**

Part of a balanced formula for the good health of all life stages and especially important in enhancing livability of young iguana hatchlings

► **Highest quality ingredients**

Improves digestibility and delivers important nutrients

► **Stringent quality control standards**

Fixed formulations provide consistent dependable nutrition

► **Formulated by veterinarians and nutritionists**

Provides correct and balanced nutrition for optimum energy and health

► **Canned product**

Longer shelf-life and easier to store than dry diets

Product Characteristics

Vegetable-based, loaf-style canned product.

Shelf-life: Three years from date of manufacture.

Iguana Diet Canned

Feeding Instructions

Feed ZuPreem® Iguana Diet Canned free choice to iguanas and other plant-eating lizards. Replace with fresh canned diet if food becomes dried out. Cover and refrigerate unused canned food for up to five days. If refrigerated, return the diet to room temperature prior to feeding. Freshly opened product is always more palatable than older refrigerated product.

Iguanas and other lizards accustomed to another diet will eat ZuPreem Iguana Diet Canned if it is mixed with or smeared on the existing diet. Over a course of seven to 14 days, gradually increase the amount of the ZuPreem diet until it makes up 100% of the total diet.

ZuPreem Iguana Diet canned can be made into small balls and hand fed, especially when it is necessary to determine that the animal is eating regularly. Going off food may indicate an early health problem.

Most fruits and vegetables commonly fed to iguanas are deficient in calcium. Therefore, if the ZuPreem Iguana Diet Canned is supplemented with fresh produce, make sure that no less than 80% of the total diet is the ZuPreem diet. The addition of vitamin and mineral supplements is discouraged and can be harmful to the animal.

Note – As an indicator of health, always monitor for changes in weight and body condition. Provide adequate amounts of food to maintain body condition, preventing excessive thinness or obesity.

Always provide clean, fresh water.

Ingredients

Water, Corn, Alfalfa meal, Soybean meal, Oat bran, Dextrose, Vegetable gum, Dicalcium phosphate, Vegetable oil, Iodized salt, Calcium carbonate, Ferrous sulfate, Zinc oxide, Choline chloride, Copper chloride, Manganous oxide, Cobalt carbonate, Calcium iodate, Sodium selenite, Vitamin A supplement, Vitamin D₃ supplement, Vitamin K supplement, Vitamin E supplement, Thiamine, Niacin, Calcium pantothenate, Pyridoxine hydrochloride, Riboflavin, Folic acid, Biotin, Vitamin B₁₂ supplement.
